香港--AESOP歌赋街门店

HONG KONG, AESOP GOFU STREET STORE

设计首要克服的条件，即不是与之对抗，而是拥抱场地的形状，整体布局从前到后跨越700mm高差的水平地板。因此，玻璃地砖在此得到了充分运用。

The first condition that the design overcomes, that is, not to fight it, but to embrace the shape of the site, the overall layout spans the horizontal floor with a height difference of 700mm from front to back. Therefore, glass floor tiles are fully used here.

武汉--DOING咖啡

WUHAN, DOING COFFEE

从地到顶的水晶墙体限制了视线和行进，但弧形环绕包裹，每一隅都是独立的小天地；秩序垒叠的玻璃砖冷冽坚硬，但层层筛选让光变得温柔，时间也慢了下来。

The crystal wall from ground to top limits the line of sight and travel, but the arc surrounds the wrapping, and each corner is a small world in its own right; The glass bricks stacked in order are cold and hard, but the layers of sieves make the light gentle and time slows down.

这两道墙营造了一个梦，围墙是透明的，墙之间的空间确定而又模糊，但彼此可见。这是可能和希望，不是禁锢和封闭。墙也可以是有生命的，而不仅仅只是一个分隔物或是参照。

These two walls create a dream, the wall is transparent, the space between the walls is definite and blurred, but visible to each other. This is possible and hopeful, not confinement and closure. Walls can also be alive, not just a partition or reference.
